

# Snapdocs eVault

A modern eVault, built from the ground up for the mortgage industry

Today, eNotes are the single most valuable aspect of digital closings. But the eNote workflow is still so cumbersome that very few lenders actually do them. Snapdocs eVault reimagines vault technology and the workflows around them so lenders can effectively implement eNotes and rapidly scale them across their portfolio.

Snapdocs eVault is a modern, easy-to-use solution built from the ground up. Combined with Snapdocs Digital Closing Platform it provides a completely turn-key eNote solution for mortgage lenders. This allows you to realize the benefits of eNote - increased operational efficiency, reduced risk, better accuracy and control of loan collateral, and more - without being stalled by complex implementations and technology that doesn't truly solve your challenges.

At Snapdocs, we're connecting all of the participants in a real estate transaction together to create the perfect closing experience. Snapdocs eVault is the next investment in our digital closing platform required to achieve this vision. By expanding upon the connectivity we've already built for closings, Snapdocs eVault allows us to seamlessly connect more participants in the mortgage industry and accelerate transactions throughout the life of the loan.

## Benefits

- ✔ Instantly implement eNote at your organization
- ✔ Effectively scale eNotes across your loan portfolio
- ✔ Accelerate your post-closing, servicing & secondary market processes

## Features

- ✔ Seamless eNote experience for borrowers
